The name **OKATOMA** came from the Choctaw word "Okatoba" which means "to be watery". This is one of the BEST canoeing streams in our state! Now they're in our forest & towns. Probably the biggest attraction to the canoeist is the series of small waterfalls & rapids spilling over shelves of sandstone & clay. They range from a few feet of slight water to waterfalls of 2 - 3 feet! The Okatoma is a challenge & a perfect introduction to class I (beginner) white water!
